## How to prevent tea stains!

Place in a pot and fill the pot with water. Bring to a boil and simmer for 3 minutes. Let cool, then remove and wipe dry with a soft cloth to prevent tea stains from occurring.

### Maintenance:

- 1 .It is ordinarily enough to simply rinse and turn over to air-dry.**

→ It can also be better to wipe dry with a soft cloth.

- 2 .If you feel the need to sterilize your teapot, you can do so by placing it in boiling water.**

→CAUTION: Do not use chlorine bleach, because it will soak into the ceramic.
